

DRAIN CLEANERS AND MAINTAINERS

BLAZE

Mainline Sewer Maintainer

BLAZE is a powerful mainline sewer maintainer that is activated by water. When water is mixed with Blaze it creates an exothermic reaction which generates considerable heat and agitation. With its metallic prills, Blaze will dissolve grease, fats, paper, rags, and other protein and carbohydrate matter, as well as disintegrate cellulose and small tree roots. An excellent preventative maintenance product that will save time, money and labor. For pipes larger than 2" in diameter, pH 13

USE ON

- Main Sewer Lines

USE IN

- Meat Plants
- Hospitals
- Apartments
- Municipal sewers
- Poultry Plant

USE FOR

- Grease
- Tree Roots
- Paper
- Rags
- Anything Organic

DIRECTIONS FOR USE

BLAZE needs water to be activated. If the sewer line is dry, cold water should be poured down the manhole after product is added. After blockage is open, flush line thoroughly with cold water.

FOR INDUSTRY: BLAZE is recommended for unclogging mainline drains (particularly in packing houses, processing plants, large apartment complexes, and manufacturers) where accumulation of large amounts of organic matter tend to clog drainage systems. Remove strainer from floor drain and add 10 lbs. of BLAZE to every 50 feet of sewer line to be treated.

FOR MUNICIPALITIES: (per 500 feet of line)

4" to 6".....	1 Bucket
8" to 12".....	2 Buckets
14" to 18".....	3 Buckets
18" to 20".....	4 Buckets
20" to 24".....	5 Buckets
