

DRAIN CLEANERS AND MAINTAINERS

ENZ-O-MATIC GT

Grease Trap Digestant

ENZ-O-MATIC GT is a powder grease trap digestant. This special blend of bacteria cultures and lipase enzymes designed specifically to attack the build up in grease traps. When used regularly, it will prevent clogs and reduces the frequency of manual clean out.

USE ON

- Sinks
- Garbage Disposals
- Grease Traps
- Septic Tanks
- Restrooms
- Porta Toilets
- Drain Lines

USE IN

- Schools
- Hospitals
- Nursing Homes
- Apartments
- Athletic Clubs
- Restaurants
- Hotels/Motels

USE FOR

- Organic Waste
- Grease
- Fats
- Protein
- Cellulose

DIRECTIONS FOR USE

Grease traps should be cleaned before a maintenance program is started on other drains to prevent overloading of the system. For best results, apply the digestant at closing time to allow the bacteria and enzymes to work undisturbed overnight.

For initial cleaning of dirty, slow, or clogged grease traps of average size (about 20 cubic feet), use a 1 pound dose of this digestant. Dissolve in one or two gallons of warm (NOT HOT) water, and let stand for one hour. Then pour this mixture into the grease traps or the nearest drain. If the grease trap is full of very hot water, flush with cold water first. Cleaning action will be faster if the floating crust in the trap is broken up before adding the digestant. Repeat this treatment every 3 days until water flows smoothly through the trap. Commercial or institutional traps require larger treatments of 2 pounds of digestant.

Traps should be maintained by weekly additions of digestant. Dissolve 1/2 pound in warm water and add directly to the trap to prevent back-ups and accumulations
