USE FOR

- Cigarette Smoke
- Food Odors
- Garbage Odors
- Pet Odors
- Restrooms
- Musty Rooms
- Any Malodors

DIRECTIONS FOR USE

For Odor Elimination On Hard Surfaces:

First clean up excess odor-causing material if present. Then simply spray the product directly on area that it is need of treatment. It is important that the product reaches the source of the odor. Allow product to saturate grout cracks and openings. Allow product to dry completely before mopping or cleaning.

For Odor Elimination On Carpet or Fabric:

When treating carpet or fabric it is important to saturate the treatment area with enough product to penetrate the source of the odor (i.e. carpet pad and/or sub-floor). If carpet has been pulled back or removed spray entire sub-floor and allow to dry before recovering.
