- Government
- Car Washes
- Ambulances
- Airports
- Truck Washes

USE FOR

- Dirt
- Oil
- Grease
- Road Film
- Exhaust
- Tree Sap
- Carbon

DIRECTIONS FOR USE

1, Thoroughly dissolve 1/2 pound per gallon of water as a concentrate. Use at an application rate of 1 to 20 up to 1 to 50. 2. Apply from bottom up with at least 500 psi. 3. Allow a minute or so to penetrate and dislodge the film. 4. Rinse from top to bottom using plenty of clean water. 5. Remember to flush pressure washer with clean water before storing.

To remove most heavy soils, including traffic film on painted surfaces, premix or set suction at 1 part product to 20 parts water.

For light soil loads, this product may be used at 1 part product to 40 parts water.

Fiberglass, anodized aluminum, and badly abused vehicle surfaces that are first being put into a maintenance program may require hot water or brushing. Once brought into condition, they can be superly maintained by the product with little or no brushing. Faulty or old oxidized paint should be mechanically removed prior to cleaning to prevent run down streaks.
